

Ravensby Glass in association with Screenline® can now offer sealed units with integral blinds.

Screenline® is a revolutionary system that allows blinds to be incorporated inside a sealed unit and operated externally by means of a magnet, with no break in the sealed unit seal. The blinds can be raised, lowered or tilted by the magnet, which is operated by either a cord pull or by an external motor.

The major benefit of this system is that the blind will never need to be cleaned, and the blind cannot interfere with the cleaning of the glass.

Additional benefits: -

- Blinds remain free from accidental damage.
- Cords can be easily removed when not required.
- Direct sunlight reduced.
- Windows easier to open.
- Sills kept free.
- Maintenance free

Venetian

Remote Controlled Venetian

Pleated

Roller

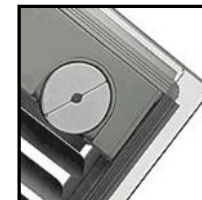

Ravensby Glass Integral Blinds are available in various different styles including venetian blinds, pleated blinds and also roller blinds. Remote controlled motorised blind options are also available. They also come in a wide range of colours to suit all types of rooms and tastes.

Colours Available:
