Ravensby Glass supplies processed glass products to many different industry sectors and continues to invest in the latest innovation in processing machinery.

## *High Quality Glass Processing*

Our 3 Bottero 910P Straight line Bevellers allow us to produce high quality bevels and mitre edges.

Our Intermac machine allows us to supply shaped bevelling and shaped polishing as well as many other finished edge profiles.

Our intermac drill is a highly accurate piece of equipment which enables us to drill various sizes of holes with great precision.

For prices or samples please do not hesitate to contact us!
