

Ravensby Glass has a large processing department with 3 CNC machines which allows us to process high performance glass ideal for shower screens and enclosures.

We can supply glass doors with patch fitting cut out holes and lock holes.

Our combination of machinery with our highly trained operatives will continually ensure a high quality finished product including polished edges, drilled holes, intricate cut outs and more...

Enduroshield provides long-lasting protection for all interior and exterior glass projects, and significantly reduces maintenance costs.

Enduroshield turns standard glass into easy-clean, non-stick surfaces whilst providing long-term protection that has been durability tested for a simulated lifetime of 10 years\*.

\*Based on 10 years of simulated normal use and certified by TUV Rheinland.
